

Ian Rowley
Vice President of Outage and Maintenance Services
Bruce Power

Ian Rowley is the Vice President of Outage and Maintenance Services for Bruce Power. He is responsible for the Outage program at Bruce Powers 8 CANDU Reactors as well as providing Maintenance services that support fuel channel and system inspections.

Ian has over 35 years in the nuclear industry, that includes careers in the United Kingdom, United States and Canada and four different reactor designs. Over these years Ian has had a progressive career which has seen in him roles from the shop floor as a Instrumentation and Control technician to senior levels of management within various programs such as Maintenance, Engineering, Work Management and Performance Improvement within station operations and corporate governance.
