

**Jason Cameron**

Vice-President and Chief Communications Officer

Jason Cameron became Vice-President and Chief Communications Officer, Regulatory Affairs Branch, on May 31, 2013, where he leads the CNSC's strategic policy, communications and regulatory framework initiatives. He has dedicated the past two decades of his career to nuclear issues, regulatory policy and international relations.

He joined the Atomic Energy Control Board of Canada (the CNSC's predecessor) in 1998 as a Safeguards Officer. Over the next 15 years, he assumed progressively senior roles including Chief of Staff, Secretary to the Management Committee, Head of Evaluation, and – most recently – Director General of Strategic Planning. In this capacity, he led the CNSC's planning and reporting processes and managed the coordination of intergovernmental, international and Aboriginal relations.

Before joining the Government of Canada, he was a Visiting Information Officer with the World Nuclear Association (then known as the Uranium Institute), based in London, England. Here, he was responsible for analyzing the impact of strengthened import/export controls on the international nuclear industry.

He completed his post-graduate Master's degree in international relations and his Bachelor's degree in political science at the University of Calgary.
