

**Michael H. Chatlani**  
**Vice President, Marketing & Sales**  
**Power Systems and Simulation**  
**L-3 MAPPS**

Since 1996, Mr. Chatlani assumed responsibility for L-3 MAPPS' Power Systems and Simulation business's sales and grew sales and market presence, establishing the company as the world leader in the delivery of power plant simulators. The globally envied Orchid® brand--- the software that drives L-3 MAPPS simulators--was also developed under Mr. Chatlani's leadership.

He is supported by sales professionals, a proposal development team and several sales representatives globally. Mr. Chatlani also manages the company's communication needs.

Prior to 1996, Mr. Chatlani held various positions in project management implementing both energy management and power plant simulator projects.

Mr. Chatlani holds a Bachelor of Engineering (Mechanical) degree from Concordia University in Montreal, Canada.

L-3 MAPPS has more than 40 years of experience in delivering high fidelity power plant simulators to leading utilities and plant designers worldwide. In addition, the company has some four decades of expertise in supplying plant computer systems for Canadian heavy water (CANDU) reactors.
