

Barclay D. Howden, B.Sc., P.Eng.

Barclay Howden is a professional engineer who graduated in chemical engineering from Queen's University in 1981. Mr. Howden started his career at Atomic Energy of Canada Limited's Chalk River Laboratories (CRL) where he worked in nuclear reactor operations and nuclear safety. After seven years at CRL, he spent three years with a private engineering firm providing nuclear safety assessment services to the nuclear industry. In 1991, Mr. Howden joined the Atomic Energy Control Board, now the Canadian Nuclear Safety Commission, and has worked in progressively senior positions. His experience has been broad, covering such areas as NPP new build, nuclear emergency preparedness, non-power reactors, uranium mining, and nuclear waste. He most recently was the Director General of the Directorate of Power Reactor Regulation and has just transitioned to a strategic advisor role in support of the Executive Vice-President of Regulatory Operations at the CNSC.
